

PC Spray Stakes

Pressure Compensated Spray Stake

Applications:

For all mini-spray nurseries and greenhouses applications

Specifications:

- High flow rates to supply correct irrigation in large pots/ growing bags.
- PC spray stake is ideal for any application in which a soil wetting mini spray pattern is desired.
- PC spray stake is manufactured with UV resistant resin to provide years of trouble-free service in both indoor and outdoor applications.
- Easy of use, pre assembly. components, excellent performance.
- Optional CNL (anti drain system)

Features and Benefits:

- Pressure compensated flow ensuring constant flow rate at varying inlet pressures.
- Optional CNL :
When pressure in the pipes drops (after valves shut off at the end of an irrigation cycle) and the desired pressure is achieved, the CNL mechanism closes the water passage. The pipes remain full of water and ready for the next cycle.
- Ensures uniform water and nutrient distribution during irrigation.
- Allows the installation of spray stake systems in areas with steeper slopes.
- 2 spray patterns adaptable to suit every substrate surface or container.
- Uniform wetting pattern over the entire surface.
- Horizontal connection.
- Water flow blockage mechanism to function when a pot is sold and/ or shifted from position to prevent water and fertilizer loss.
